GENTLE THERAPY WITH FREQUENCY TECHNOLOGY

Therapy programmes on ChipCards for the BioWave.

Alan E. Baklayan

Information is the first step towards change. Information4Life informs you thematically and concisely to help you maintain your health.

Contents

Introduction – What is the purpose of this ChipCard book?	7	GewAbn (Weight regulation)	
BioWave Frequency Therapy – Simply effective	9	<i>Improve your diet with Hormone-frequencies</i>	44
Supporting Measures.....	11	Hep C (Hepatitis C)	
Standard BioWave Programs	15	<i>Frequencies against Hepatitis C and other Hepatitis viruses</i>	46
A (Asthma)		HNO (Ears, Nose and Throat)	
<i>Highly successful even with severe Asthma</i>	18	<i>Inhibit bacterial infections</i>	47
AR (Anti-Smoking)		HSX (Herpes simplex)	
<i>AR ChipCard and specific organ treatment make it possible to give up</i>	23	<i>Activate protection against all types of Herpes</i>	49
ASP (Aspergillus)		IM (Immune System Stimulation)	
<i>Specific frequencies against Aspergillus (Mould)</i>	25	<i>More energy for the immune system</i>	51
BB (Blood Balance)		ImPar (Immune System Parasites)	
<i>Successfully lower high blood pressure</i>	26	<i>Activate the immune system against parasites</i>	52
BiBlo (Bioenergetic Blockages)		ImVir (Immune System Viruses)	
<i>Enables successful therapies</i>	28	<i>Activate the immune system against specific viruses</i>	54
BL1 (Blood Zapper Frequency)		InCom (Intracellular communication)	
<i>Purified blood is fortified blood</i>	31	<i>Really effectively testing, minimize intracellular strain</i>	56
BO (Borreliosis – Lyme disease)		KONZ (Concentration)	
<i>Lots of frequencies for Lyme disease</i>	32	<i>Greater concentration, be more productive in everyday life</i>	57
BR (Bio-Regeneration)		L (Liver)	
<i>Relief for cancer and other bio-regenerative problems</i>	34	<i>Lipometabolism free parasites, reduce cholesterol level</i>	58
CAN (Candida)		LY (Lymphatic drainage)	
<i>Well developed method to be free of Candida</i>	36	<i>Gently treat congestion and stagnation</i>	61
DB (Diabetes)		MIG (Migraine)	
<i>Just the right combination of frequencies can really help</i>	38	<i>Successfully eliminate parasites that cause migraine</i>	63
DTX (Detox)		Reg SZ (Menstrual Pain)	
<i>Regular detoxification is a prerequisite for success</i>	40	<i>Menstrual pain and irritable bladder can be a thing of the past</i>	65
FvE (Emotional Stress)		Software Notes for the ChipCards BB, FvE and LY	67
<i>Reduce the effect of emotional stress, slows down the metabolism of cancer</i>	42		

Introduction – What is the purpose of this ChipCard book?

Dear Reader,

Thank you for your interest in this book on pre-programmed ChipCard therapies. Knowledge and understanding are the first step towards change that can lead you towards a better quality of life.

That is the basic principle behind the contents of this brochure.

Irrespective of what you already heard about or experienced with bio-frequencies in the past, BioWave high-frequency therapy is all about the systematic use of frequencies.

The careful selection of the appropriate frequency can play an important role in improving your quality of life. That is why we – Alan E. Baklayan, ND and the Info4Life team – have carefully prepared the information on the ChipCards by topic and sorted them alphabetically, from A (Asthma) to Reg SZ (Menstrual Pain).

Each heading allows you to determine at first glance what the relevant section is all about, so you can quickly and easily find the solutions for the topic or a specific complaint that you are currently concerned with. On the other hand, if frequency technology is still new to you, we recommend reading through this informative brochure from beginning to end.

While reading this book, you may find you have questions that are not covered sufficiently here. We have therefore provided you with enough space to note down your questions, comments and expectations about the topics discussed. This will help you to get answers from the people you obtained this book from. He or she can either provide you with answers themselves, or refer you to those who can help you with your specific issues. The contact details can be found in the address field on the back.

A ChipCard contains the frequency programmes that can only be used in conjunction with the basic hardware, and this equipment is called the BioWave 21 GS. Before we start to describe the individual

ChipCards, we will first provide you with background information on the BioWave frequency technology, the principle behind using frequencies, and what makes them particularly useful.

This is then followed by information about additional measures that can be used to assist you.

Although the BioWave frequencies can have an effect on their own, we advise you to ensure you are drinking enough water, which will benefit your body pH levels (i.e., be less acidic). For this reason, you will also find some helpful hints on how to do this in later sections of this document.

In addition to the individual ChipCards, the BioWave 21 GS is supplied with a number of built-in programmes. We will also describe these and how they can help you further.

I hope you enjoy reading this book and hope you will find the information that will help you.

Regards

Alan E. Baklayan, ND

Comments on this English edition

This English edition is a translation of the original German language book. We have made every effort to translate this document correctly and have had to rephrase some parts of it to make it more understandable. In case of confusion, the original version is the German edition.

There are a number of references to other publications, written by Alan E. Baklayan and other authors that are not available in English at the time of writing (June 2011). Where possible, we have provided references to the respective English language version or to similar publications.

There are many references to the book “Therapy Tips and Household Remedies” by Alan E. Baklayan, ND. At the time of writing, this book has not yet been translated into English. The original German title is “Therapie-Tipps und Haus-Rezepte”, ISBN 978-1-907469-02-2 and can be downloaded free from www.goldenstream.info

We have sometimes had to change the titles of the ChipCards to make them more understandable in English. Where the English title differs from the original German one, we have given the original German title with a more literal translation where necessary.

This eBook will be updated as new information and ChipCards are released, so you should regularly download the latest version.

BioWave Frequency Therapy – Simply effective

The BioWave frequency technology makes use of resonance frequencies. The following example illustrates the effectiveness of this principle: A soprano singing a high note can cause a wine glass to break by singing in resonance with the specific frequency of that glass. In the same way, frequency technology can destroy or weaken the pathogens that have infested your body in places like the lungs, liver, intestines and other areas by stimulating their natural resonant frequency. This assists the immune system to attack the pathogens and reduce or eliminate pain.

The BioWave units and resonance frequency programmes work like a TENS unit for chronic and acute pain. The BioWave’s wide range of therapeutic effects – although not yet recognised by conventional medicine – takes into account the latest scientific advances. These require that in the treatment of pain, to not only interrupt the pain signals (TENS-1 and TENS-2 programs), but also to stimulate the body.

After instruction, anyone can carry out these programs themselves. A built-in safety system eliminates any danger that may arise from application of electricity to the body.

Additional comments on the effects of the frequencies used.

Microorganisms cannot tolerate exposure to an electrical current in the mean of their respective resonance frequency along with an alternating current of a few volts.

In connection with the frequency generator, a weakened body can be reactivated in a simple and modern way.

In the application of bio-frequencies there is a fundamental difference:

- a.) The first two universal frequencies (in the standard programs), according to Dr. Hulda Clark, work as broadband frequencies. You can imagine these frequencies metaphorically a bit like a “sawn-off shotgun” that activates the body in a wider spread to return to its full functionality. This can be useful, for example,

if you do not know exactly which frequency you need and can be used as a start.

- b.) In contrast, frequency programs (from INF – the standard Flu program) use targeted higher frequencies. These eliminate a specific pathogen a bit like a rifle with a telescopic sight. The selected frequency attacks the pest much more precisely because it works directly with the natural resonance frequency of the pathogen.

To learn more about the background information of bio frequencies, we recommend the German language book “Sanftes Heilen mit Biofrequenzen“ (Gentle Healing with Bio-Frequencies) by A. E. Baklayan, ND and the English book “The Rife Handbook of Frequency Therapy” by Dr. Nenah Sylver, PhD (www.rifehandbook.com).

Additionally, you will find further references in relation to specific ChipCards. The contact address on the back also advises where you can obtain these brochures and books.

Supporting Measures

In my opinion, there is no doubt about the effectiveness of BioWave frequency technology. However, after using the BioWave, you can experience fatigue, weakness, headaches or aggravation of the symptoms. These should be seen as reactions to the resulting toxins as such toxins can overwhelm the body’s ability to regulate and detoxify the body. For the same reason, patients with multiple allergies and those who are extremely over acidified are likely to have stronger reactions. This relationship has been shown clearly in practical experiences with patients.

If you encounter any unexpected side effects, we recommend supportive measures, which I will discuss in greater detail below:

1. Significantly reduce the treatment time, e.g. start with three 1-minute treatments and slowly increase the treatment time.
2. De-acidify the body as explained later in this book.
3. Drink plenty of fluids to support the process, at least two litres (more than 4 pints) per day, preferably reverse osmosis or low mineral non-carbonated water.
4. Assist all forms of excretion in order to help remove the toxins from your body.
5. Ensure you have a good daily bowel movement. If necessary take a good laxative tea, or give yourself an enema.
6. Shower often to encourage skin secretion.
7. Exercise moderately to encourage sweating.
8. Do a liver cleanse.

A. Are there any side effects?

How to deal with any unexpected side effects

If after using the BioWave, you experience headaches, fatigues, weakness or wild dreams, or if chronic infections reoccur, you can try the following:

- Stop the BioWave treatment (zapping) until the problem subsides
- Restart the zapping gradually again
 - 1x 1 minute on the first day
 - 1x 2 minutes on the second day
 - 1x 3 minutes on the third day

If the side effects reoccur, we recommend continuing with the dosage from the previous day.

In extreme reactions (e.g. all symptoms get worse), then you have one of five regulation blockages which need to be resolved first.

Patients fitted with a pacemaker are advised against using the BioWave.

During pregnancy, we also recommend avoiding use of the BioWave as no clinical studies are available and for ethical reasons no such studies can be made. A number of pregnant patients have reported to have used the BioWave. The women evidently did not experience any negative effects for themselves or their child in the womb. On the contrary, both benefitted considerably. The fewer parasites and environmental toxins found in the mother's body, the more favourable the conditions are for the unborn child.

B. De-acidification of the body

Recommendations:

- Once a week, eat vegetable soup
- 7 x 7 Detox Tea, two cups a day
- Mineral gold, 3 x 15 drops daily before meals
- Calmag, 4 tablets at night before bedtime
- Alkaline baths
- Lactisol, 2 x 10 drops daily before meals
- It is prohibited to take any sugar, alcohol or wheat flour

C. Drinking habits

It is extremely important to drink enough fluids every day, in order to regularly detoxify your body and maintain its many vital functions¹. Toxins have to be properly bound and excreted. For this to happen, requires „unbound“ water.

This means that if a water molecule is bound to certain minerals and substances, as in mineral water (incl. still water) for example, then there is no further binding capacity available in its structure. This means, it cannot bind to toxins in order to excrete them from the body. This fact has not been widely realised, even in the professional world. Due to the increased number of toxins released into the body from devitalised pathogens, while using the BioWave, it is therefore essential to drink at least two litres (more than 4 pints) of non-carbonated water a day – irrespective of the type and quantity of any other drinks taken. Neglecting this rule is one of the most common reasons for unwanted side effects and reactions.

Although the hygiene regulations in western countries, in comparison with other parts of the world, are very good, tap water does not contain any free, unbound water. Often there are a lot of dead bacteria, heavy metals and environmental toxins to be found in it. Physically, this can be detected by the electrical resistance value of the water as

¹ „Your Body's Many Cries for Water“, Dr. F. Batmanghelidj, MD - Global Health Solutions 1992, ISBN 0-9629942-5-1

the lower the resistance, the more contaminants can be found in the water.

When we tested a few hundred samples of tap water from households, in our practice, we found that every water sample was contaminated with heavy metals!

If we take these results into account, our tap water is of a low quality. It is therefore really important, during therapy with the BioWave, to drink high-quality water with a very high resistance value. Suitable water can either be made with a reverse osmosis unit or purchased from health shops (e.g. in Germany we recommend Plose-spring water from the South Tyrolean Alps).

Tap Water: Resistance value of approx. 2 500 Ohm

Plose-Water: Resistance value of approx. 28 500 Ohm

Reverse Osmosis Water: approx. 30 000 Ohm

Reverse osmosis water has the highest resistance value. The water should always be filled in glass, not in plastic bottles.

When using reverse osmosis water, in comparison with normal tap water, you have about a ten to twelve-fold higher detoxification capacity. With a resistance of 30 000 ohms, the investment in a reverse osmosis filter is worthwhile, particularly in a family of three to four people. Drink two litres (more than 4 pints) daily, even if it is difficult at the beginning, and your body will thank you for it. After a period of about six weeks, your body will adjust and you will feel a greater vitality!

To learn more about detoxification, especially for liver cleansing, see the book „Therapy Tips and Household Remedies“ by Alan E. Baklayan, ND.

Standard BioWave Programs

Frequency programs that are preinstalled on the BioWave

■ GoldenStream –

The golden balance for your health – 5:30 min *

... is the most important of the BioWave's integrated frequency programs. It harmonizes negative influences, by simply balancing the energy levels of all meridians. Well regulated meridians promote the full capabilities of your immune system. We therefore recommend using GoldenStream to balance your immune system as both a preventative measure and before running any other ChipCard programs. More info can be found at www.goldenstream.info

■ 7-20-7-20-7 – 33.3 KHz – 61 min *

Standard program, implementing Dr. Hulda Clark's universal frequency of 33.3 KHz. Further information can be found in Dr. Hulda Clark's book: "The Cure For All Diseases"

■ DurationZapp - 33.3 KHz - 60 min *

Applies Dr. Hulda Clark's universal frequency continuously, without pauses, for one hour.

*The given times are the recommended application time for the respective program.

■ **INF - Standard program for Influenza - 6 min ***

Application time: 6 minutes – in acute infections, repeat 4-5 times until significant relief occurs. Additionally, we recommend in both acute cases and as a preventive measure: high quality, natural vitamin C – not unbuffered ascorbic acid.

■ **CLD – Colds and Sinus program - 8 min ***
(for colds / sinus and ear disorders)

In acute cases, use up to four times a day until significant relief occurs. Additionally, we recommend nasal irrigation with a teaspoon of colloidal silver (12-15 PPM).

■ **Pain Rife – Pain program, according to Dr. Rife – 13 min ***

Can be applied for all kinds of pain, wounds, or soreness following radiation therapy. Application with adhesive electrodes is also possible. See the instructions provided in our TENS brochure for more details.

■ **Zappicator – 15 min ***

The Zappicator energizes foods and eliminates environmental toxins and solvents from foods, cosmetics, etc. Detailed instructions for the use of Zappicators can be found in the book “The Cure for HIV and AIDS” by Dr. Hulda Clark, Ph.D. N.D.

■ **TENS 1-3 (Transcutaneous Electrical Nerve Stimulation)**

TENS 1 for acute pain, TENS 2 for acute/chronic pain, TENS 3 for chronic pain. See the instructions provided in our TENS brochure for more details.

■ **Plate Zapping – 29 Hz for 30 min***

This is used to transfer frequencies onto an external plate (accessory). This allows for the more intensive and specific treatment of individual organs.

■ **BK – Blood Electrification – 3.92 Hz for 60 min ***

The BK blood frequency applies current to your arteries, via your wrists, in order to render blood parasites harmless.

Alternatively, both wrist bands can be applied on one arm at a distance of about 10cm (4 inches) apart. In contrast to the higher frequencies we otherwise use, Dr. Beck specifies a frequency of just 3.92 Hertz, which has been found to be more effective for this application. The BK blood frequency is compatible with theta brain waves, strengthens the body’s own resonance system and is stress free. The intensity should be adjusted so that a slight tingling is felt, which should not feel uncomfortable.

Why applying electricity to the blood is so surprisingly successful, lies in the direct way the current is applied. A biologically effective electric current is applied to the arteries in the wrist. The most important factor is the actual current flow within the arteries through the blood, as only this will render the blood parasites harmless. This results in the electrified blood cells living longer, which can help to solve many symptoms and problems for which no other solution can be found.

The BK blood frequency has no side effects, although some detoxification reactions can be unpleasant. As with all applications with the BioWave, the frequency can be applied in your normal daily life as it does not restrict your freedom of movement and the BioWave unit can be worn on the body. The BK Blood frequency has already helped a lot of people to regain their strength to better get through the rigours of their daily lives. The effectiveness of the Beck program can be enhanced by taking colloidal silver (12–15 PPM) 15 minutes before application.

*The given times are the recommended application time for the respective program.

At a glance

Highly successful even with severe Asthma

Bioenergetic Testing

Lung meridian or directly on the lung (using organ filter ampoule)

Test Methods

2-cup method, Golden Plates.

During the ChipCard program, intensive intracellular testing of all meridian end points is necessary.

Supporting ChipCards

- **BiBlo** dispels bioenergetic blockages in advance
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels
- **Candida (CAN)** intensified Candida treatment
- **Aspergillus (ASP)** Assists in the elimination of Aspergillus

A (Asthma)

Highly successful

How it Works

The reason we have had so much success is because, as Dr. Hulda Clark discovered, almost every asthma case involves the roundworm (Ascaris). Numerous scientific studies have demonstrated the impact of this roundworm.

Roundworms and roundworm larvae are, almost without exception, responsible for both the allergic reactions and the asthma symptoms.

Additional classic causes are dust mites and Aspergillus.

The Asthma-ChipCard contains frequencies for the removal of roundworms, roundworm larvae, Aspergillus, dust mites and Candida

Application

Depending on how severe the asthma is:

- Patients with severe asthma: May need further medical assistance
- Patients with mild asthma, e.g. Exercise-induced asthma: Use of the asthma ChipCard is often sufficient. It should be used at home for an extended period of 8-12 weeks and supplemented with Papain therapy (see page 21)

Duration per application (40 minutes total)

Ascaris 1	4:00 min
Ascaris 2	4:00 min
Aspergillus	8:00 min
Dust mites	8:00 min
Tuberculosis 1	4:00 min
Tuberculosis 2	4:00 min
Candida 1	4:00 min
Candida 2	4:00 min

Important: If an asthmatic feels he is about to have an asthma attack or is already having one, the asthma ChipCard should be used immediately.

Severe asthma is, in principle, **always** associated with a Candida infection. It is therefore only possible to relieve the symptoms when Candida and Aspergillus have been eliminated. Both fungal infections need to have completely disappeared before the treatment can be successful.

In order to get rid of Candida, it is important to maintain a strict diet (see page 21). Even then, relief from Candida will take at least four months, provided the patient is otherwise in a stable condition. Even though the current literature states otherwise: relief within 4-6 weeks is not possible and, in a few exceptional cases, successful treatment may take up to 1 ½ years.

Asthma ampoules kit

Bronchial-pulmonary

Ascaris Mix

Aspergillus mix

Mite

Tuberculosis

Candida Mix

Suggested additional therapy

Bronchial Asthma, Bronchitis, Pneumonia and chronic cough are often associated with roundworms and Aspergillus infections. Eczema and Psoriasis are almost always associated with both roundworms and a Candida infection.

Results / Benefits

With continuous use of the asthma ChipCard, and adherence to the diet, there have been many widely documented cases with fantastic results! Other patients were almost symptom-free after 6-8 months. Candida tests resulted in measurements in the range of just 0.6 to 0.8 volts.

Due to the tremendous improvements, some patients then neglected to keep to the strict diet, which resulted in a return to the old condition and increased test values.

After then consequently resuming the program again, the patients were finally free of all asthma symptoms after 1 ½ years where even Candida spores could no longer be detected.

Note: After completion of therapy, there is no more need to keep to the diet!

Therapy Tips

- Use Dr. Hulda Clark's classic frequency for roundworms (408 kHz)
- Refrain from using the asthma spray, in **consultation with your therapist**, unless absolutely necessary.
- For long-term results, adjust the voltage intensity to the strongest you can handle at first, and then lower it slowly.
- Acute asthma attacks: Start with 15 volts and then reduce the voltage downwards. Determine which voltage is best for you. The Ascaris roundworm will be quickly affected by such a treatment.
- To increase the effectiveness of the asthma ChipCard, attach the electrode with the red cable directly on the point when you can feel the pressure building up.

- With severe asthmatics, the Candida infection sits deep in the lungs. If the diet is interrupted or the prescribed medication is reduced, the fungus can quickly return to its former strength.
- The usual cause of relapses is not maintaining the diet.

Papain treatment

Instructions for patients with asthma:

- Take on an empty stomach – do not eat anything for at least 2 hours beforehand
- Take 1000 mg Papain capsules every hour (2x 500 mg or 5x 200 mg)
- Daily intake = 5000 mg Papain capsules (10x 500 mg or 25x 200 mg)
- After the final dose, you can eat normal low protein foods
- If case of a strong reaction (sharp pain in the abdomen or abdominal pain), reduce the dosage significantly and spread the treatment over three days!
- Duration: Take the daily treatment for 6 days and then take a break for 10 days
- Repeat the Papain therapy until the symptoms subside

Candida Diet

(Supporting diet in order to remove the Candida fungus)

Prohibited are:

- Any form of sugar, fructose, honey, maple syrup, jams, chocolate
- Sugary pastry
- Sweet fruit, raw or cooked, especially grapes, oranges, peaches, plums, etc.
- Dried fruit (figs, dates, apricots), candied fruits
- Sweet fruit and grape juices, lemonades, Cola, alcohol in any form
- Artificial sweeteners (saccharin, cyclamate, aspartame)
- White flour and pasta - small quantities are allowed
- Nuts and almonds, due to mould risk

Permitted are:

- Whole wheat bread, crisp bread, in moderate portions
- Meat and sausages, except pork and when breaded
- Fish and eggs
- Potatoes, root vegetables, raw and cooked, salads, spinach, tomatoes, cucumbers, radishes, legumes, turnips
- Rice only in moderate amounts
- Muesli without any sugar or honey
- Sauerkraut, raw and cooked, onions, garlic, garden herbs
- Milk, cheese, unsweetened curdled milk products, butter
- Coffee, tea, without sugar, mineral water
- Salt and spices Supporting Mittel bei Asthma

Further Support for Asthma

More information can be found in the book: “Therapy Tips and Household Remedies” by Alan E. Baklayan, ND

AR (Anti-Smoking)

The easy way to stop smoking!

Original German Name:

“Anti-Rauch” (Anti-smoke).

How it Works

Specific frequencies are used for liver, lung, blood, intestines and mucous membranes. When combined with ampoules, for the removal of toxins from these organs, the effect is very positive and successful in combination with:

- A serious intention to quit smoking
- the AR-ChipCard
- Removal of toxins

Application

The cigarette is placed in a glass on the first plate and the lung ampoule on the second plate. Then apply specific toxin removal for the liver, lungs, blood, intestines and mucous membrane.

Duration per application (5 x 9 minutes total)

Lung	9:00 min
Blood	9:00 min
Liver	9:00 min
Intestines	9:00 min
Mucous membrane	9:00 min

Run five programs of nine minutes each. The lung ampoule is placed on one plate and the cigarette on the other plate. Specific toxin removal is performed for liver, lung, blood, intestines and mucous membrane.

At a glance

AR ChipCard and specific organ treatment make it possible to give up

Supporting ChipCards

- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels

Recommended reading

German book:
“Nichtraucher - Jetzt werden - und rauchfrei bleiben”
(„Become a Non smoker – and stay smoke free”) by Alan E. Baklayan, ND

Results / Benefits

60-70% of all smokers who followed this procedure, which makes use of plate zapping, experienced detoxification symptoms. A frequent side effect is that smokers become very sensitive to the smell of cigarettes and do not like the smell anymore. Withdrawal symptoms are minimal if the toxin removal process is performed with a cigarette.

Therapy Tips

Further information and detailed instructions, including a discussion of possible difficulties, is discussed in the book we recommended.

Note: The genuine willingness to want to quit smoking is a requirement, as otherwise the effect of even the best ChipCard and the best toxin removal methods will be somewhat limited.

ASP (Aspergillus)

Moulds do not belong in the body

Original German Name:

“Aspergillen”.

How it Works

This ChipCard is critical, as there is hardly a disease in which Aspergillus does not play a role. This especially pertains to conditions such as hay fever, liver burden, detoxification problems, asthma, cancer, and alcoholism.

Application

Frequency of use

1x daily

Duration per application (8:00 minutes total)

Aspergillus 1–8

1:00 min each

Therapy Tips

Samento has been found to be a good supportive measure against Aspergillus.

At a glance

Specific frequencies against Aspergillus (Mould)

Bioenergetic Testing

In the problem areas, e.g. lung meridian for Asthma, liver meridian for liver burden

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels

Additionally:

Depending on the disease, can be combined with other ChipCards, e.g. for asthma with the Asthma ChipCard, for liver burden with the liver ChipCards, etc.

At a glance

Frequencies to reduce high blood pressure

Supporting ChipCards

- **BiBlo** removes bioenergetic blockages.
- **DTX** promotes the excretion of wastes and detoxification.
- **ImPar** activates the immune system against parasites.
- **GewAbn** supports liver, gall bladder and the metabolism.
- **GoldenStream**
General balancing of energy levels.

by Alan E. Baklayan, ND
ISBN 0-9740287-1-1

BB (Blood Balance)

Successfully lower high blood pressure

Original German Name:

“Hoher Blutdruck” (High Blood pressure)

BB = “Blutdruck-Bremse” (Blood pressure Brake)

How it Works

The special BB (blood balance) frequency can be used by anyone who has high blood pressure, yet who does not have organic cardiovascular damage to their heart or kidneys.

Application

Frequency of use

Every 2 days, 5 minutes

intensity 1.2 volts

Duration per application (8:00 minutes total)

Experience has shown that high blood pressure levels increasingly balance more and more into the normal range. When the normal range has been reached, you can reduce the treatment to every third day, then every fourth day, etc.

Please have your blood pressure checked regularly, preferably by a qualified therapist.

Results / Benefits

It has been found that through the use of the frequency on the BB chip card, blood pressure levels can be persistently reduced, provided there is no organic reason for the condition.

For those suffering with organic cardiovascular damage to their heart or kidneys, blood pressure levels may lower, yet a lasting success cannot be guaranteed.

The conditions of being overweight, e-smog and liver parasites can prevent long-term results. Therefore, these regulation blockages need to be treated, separately.

Therapy Tips

The BB program, on the BioWave 21 GS, and wild garlic drops work well in unison. It is recommended to apply both methods simultaneously.

Usage Notes

Start with 2x 3 drops daily and slowly increase this to 2x 8 drops daily while carefully monitoring the blood pressure.

Strictly avoid **Coffee** and **black tea** during this therapy.

Software-notes:

This relatively new ChipCard requires software version V12 or higher, otherwise an error message will be displayed. Further details can be found on page 67.

At a glance

Enables successful therapies

Bioenergetic Testing

Nervous system, Triple warmer, then at the location of the symptoms

Supporting ChipCards

- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels

Recommended reading

„Cancer – Therapy and Research“
by Alan E. Baklayan

BiBlo (Bioenergetic Blockages)

Release Bioenergetic blockages

Original German Name:

“Bioenergetische Blockaden”.

How it Works

The frequencies on the BiBlo ChipCard, reduce the negative Impact of e-smog, radioactivity and scars. As virtually every patient tests positive for the presence of these blockages, this ChipCard should be used before each treatment.

Application

Before beginning any therapy, please use this ChipCard first, followed by the DTX ChipCard, before testing for parasites, etc. The ability of scars to create interference patterns should not be underestimated.

Frequency of use

Normal:	1 x week
Scar related disorders	1 x every 4 days
Pain	1 x day
Can be used as additional support for all other therapies without exception (see also below)	

Duration per application (12 minutes total)

Lateralization (dysfunction)	2:00 min
Geopathic stress	2:00 min
E-Smog	2:00 min
Radioactive decay	2:00 min
Scars	2:00 min
Sticky scars	2:00 min

Results/Benefits

Chronic pain is often resistant to therapy due to interference from scars that are on meridians: surgical scars, smallpox vaccinations, laceration injuries, etc. After careful treatment of the scar interferences, the pain levels are often reduced spontaneously. Scar therapy should be immediately followed by the GoldenStream, which can further reduce the pain levels. Use of the BiBlo ChipCard can significantly improve the effectiveness of other therapies and other BioWave ChipCards.

Therapy Tips

- Bio-energetic blockages can be both underestimated and overestimated. But when they do cause interference, bio-energetic blockages can greatly reduce the therapeutic regulation effect of biophysical frequencies. The ability to evaluate the effect of these blockages and determine how to resolve them is a crucial criterion for successful treatments. When therapies are not succeeding, carefully test these blockages and eliminate them
- The term “lateralization dysfunction” comes from Kinesiology and means that the two halves of the brain are not working together properly. This arises primarily from unilateral activities such as working for hours on the computer each day or even intense artistic work. This condition is increasingly being seen in today’s world.
- **Geopathic stress:** The presence of water veins plays an important role in the causation of cancers and a variety of diseases like sleep disorders, fatigue syndrome and hyperkinesias, when it is a right-handed load. In addition to using the BiBlo ChipCard, changing the

location of the bed is necessary, especially with serious diseases like cancer.

- **Electrosmog:** Electromagnetic radiation is caused by more and more electrical devices. Those suffering from an electrosmog allergy should keep a distance of at least 1.2 meters (4 feet) from all electrical devices (including sockets). Note that inverse square law applies and even an emf > 3 m (10 feet)/gauss will cause biological effects.

Important: Switching off the devices is not enough!

Ensure that night lamps, clock radios, electric blankets and waterbeds are either unplugged or kept at a suitable distance. TV sets, depending on their size, have to be up to four meters (13 feet) away from the bed.

- **Radioactivity:** can come from both past treatments (X-rays) and radioactive fallout from the past (Chernobyl).

Note: Recovery from exposure to radiation can be assisted by taking a daily dose of 500 mg L-Cystein capsules and natural vitamin C.

BL1 (Blood Zapper Frequency)

Blood likes to be pure

Original German Name:

“Blut-Zapper-Frequenz” (Blood-Zapper-frequency).

How it Works

This “Blood” ChipCard has been designed especially for blood purification. The frequency 3.6 Hz is used to open the intracellular space, and the frequencies 3.7 Hz and 3.9 Hz are used against blood parasites, which causes them to die off. When used in combination with other ChipCards, the BL1 can help cleanse the body.

Application

Frequency of use

How often:	1x daily
Recommended application	Minimum 6 weeks
Set maximum intensity without feeling a cribbing sensation.	

Duration per application (12 minutes total)

3,6 Hz	4:00 min
3,7 Hz	4:00 min
3,9 Hz	4:00 min

Additional Application

Provides additional therapeutic support when used in cancer therapy.

- **GoldenStream** General balancing of energy levels

BO (Borreliosis – Lyme disease)

Free yourself from Lyme disease

Original German Name:

“Borreliose”.

Application

Frequency of use

Start with once a day, then increase

In acute cases up to several times daily with the highest intensity

Duration per application (39 minutes total)

BO – intracellular therapy 39:00 min

Recommended duration: 6–8 Monate

At the beginning of the therapy, run the program no more than once a day at an intensity of 2.2 volts. This can be increased in intensity by 1 volt a day until a tingling sensation can be felt. If a strong reaction to a frequency occurs, reduce the intensity again on the following day.

Sensitive patients should only run half the program at first – that is only the first few frequencies. Then, step by step, further frequencies can be added.

In chronic cases, all parameters have to be weighed carefully, as people infected with Lyme disease can have complicated reactions. Sometimes the disease can change into an autoimmune disease. Those with auto-aggressive and autoimmune diseases should be very careful when using the BO-ChipCard.

Additional Applications

A large number of neurological, rheumatic and immune disorders find their origins in Lyme disease. In such cases, the BO-ChipCard can be very supportive. The Lyme disease pathogens are chameleon-like. They can also cause literally dozens of symptoms that are ascribed to other pathogens and other diseases.

Therapy Tips

- Synergistically test and treat paired parasites, as Borrelia are often hiding in them.
- Ensure the patient is well balanced.
- All pathogens that are associated with Lyme disease have been integrated on the ChipCard.
- An additional important tool is Samento (liquid), which has been found to be very useful in combating Lyme disease.

German books:
"Krebs – Therapie und Forschung"
(„Cancer – Therapy and Research“)
by Alan E. Baklayan, ND

„Krebserreger entdeckt,
("Carcinogen Discovered")
by Tamara Lebedeva

BR (Bio-Regeneration)

The advance in bio-regeneration

How it Works

According to current knowledge, many pathogens play a role in the development of cancer: roundworms, Trichomoniasis, Fasciolopsis buski, Fasciolopsis miracidia. Clostridia also play an important role, as do Candida and Aspergillus. The BR ChipCard targets all these pathogens. The link between Trichomoniasis and cancer is discussed in more detail in the German language book "Krebserreger entdeckt!" ("Carcinogen Discovered") by the Russian researcher Tamara Lebedeva. More detailed information is available on request or in one of our Cancer seminars.

Application

Frequency of use

Once a day with the maximum suitable intensity.

Duration per application (35 minutes total)

Ascaris 1–3	2:00 min each
Ascaris Larven	1:00 min
Trichomonas 1–7	2:00 min each
Fasciolopsis buski 1	2:00 min
Fasciolopsis buski miracidia	2:00 min
Clostridia 1	2:00 min
Clostridia 2	1:00 min
Clostridia 3	1:00 min
Clostridia 4	2:00 min
Candida	2:00 min
Aspergillus	2:00 min

Clostridia, Candida and Aspergillus are also very important in this context

In order to use the BR frequency once a day, the patient should have read the "Cancer – Therapy and Research" brochure by Alan E. Baklayan and/or the books by Dr. Hulda Clark which point out, the scope and background of this therapy.

Additional Applications

- After conventional medical treatments (for example Chemotherapy) in order to increase the chances that cancer does not return
- As a preventative for patients at risk of cancer, or where the patient has been diagnosed to be precancerous

Therapy Tips

The BR-ChipCard is a valuable support for cancer therapy, no more than that. All other aspects of the disease must be considered on an individual basis.

Supplementary

In addition to the book "Carcinogen Discovered" by T. Lebedeva, we also recommend the following by Alan E. Baklayan:

- The cancer seminar
- The "Cancer – Therapy and Research" brochure, which contains a number of insights about cancer, was written specifically for patients and discusses the current therapies and most lectures by Alan E. Baklayan, ND.

CAN (Candida)

Permanently remove Candida infections

How it Works

All Candida species have been thoroughly tested to determine the appropriate frequencies. This resulted in a very long list of effective frequencies. The four-day Candida therapy cycle has proven to achieve fantastic and sustainable results.

The application of the respective frequencies in one four-day cycle allows the effect to be repeated every day without overloading the body. This allows the entire spectrum of Candida to be covered.

Application

Frequency of use

Once a day at the maximum intensity before you start feeling the tingling sensation.

Duration per application (56 minutes total)

4 days 14:00 min each day

The procedure lasts four days of 14 minutes each = 56 minutes.

The program has to be run every day.

The Candida-ChipCard provides excellent support for all diseases and treatments that involve Candida infection.

Warning: It is very important to keep to the Candida diet as otherwise, no results can be expected.

The additional use of natural antifungals like colloidal silver and Cumanda are mandatory. Further information can be found in the recommended reading as well as in the brochure “Therapy Tips and Household Remedies.”

Results

The Candida-ChipCard is a very good method of supporting Candida therapy. The overall treatment time can be reduced by up to 30% percent. During the treatment period, the patient has to keep to the diet.

In some cases, it could be observed that there was an immediate relief of some symptoms such as itching or bowel irregularities. There are no adverse reactions (Herxheimer syndrome) known, when the patient follows instructions.

„The Cure for all Diseases“ by Dr. Hulda Clark
In particular the chapters on Diabetes (page 173), Fluke disease (page 249), Diet (page 302) and Sorghum moulds (page 388)

DB (Diabetes)

Stabilised blood sugar levels

How it Works

The frequencies combat the Coxsackie viruses, Aspergillus and of course the Candida fungus (on the pancreas), as these are “classic” diabetes problems. Crucial for a successful treatment is the frequency against Eurytrema pancreaticum (pancreatic fluke), which has been found in every diabetic from young to old. This was recognised by Dr. Hulda Clark in her book “The Cure for all Diseases”. These flukes are usually only found in cows, not humans.

The Eurytrema pancreaticum has the ability to change the entire sugar metabolism (Glycolysis). This leech therapy has led some patients to experience a very rapid improvement of their glucose levels. Therefore, this ChipCard should only be used while precisely measuring the daily sugar levels.

Application

Frequency of use

1-2x daily	Maximum tolerable intensity
------------	-----------------------------

Duration per application (39 minutes total)

Eurytrema pancreaticum	7:00 min
Coxsackie Virus	3:00 min each
Candida albicans	3:00 min
Aspergillus	3:00 min
Diabetes 1–14	3:00 min each

Additional Applications

- The Pancreatic fluke is also often involved in the development and spread of cancer. Therefore, this program can also be useful in the treatment of cancer. Just try it and see if it brings results.
- The Coxsackie virus are involved in a number of infectious diseases, for this reason, the use of the DB-ChipCard may also be helpful.

Therapy Tips

- Remember to synergistically test for the Eurytrema pancreaticum, coupled with Candida, in order to avoid overlooking any problems.
- If patients on insulin use the DB-ChipCard, their insulin requirements may change. It is therefore imperative to measure the sugar levels every day in order to avoid hypoglycaemia.

Support weak excretory organs in their function.
More info under Therapy Tips

DTX (Detox)

Detoxification is very supportive

How it Works

Here are the most effective TREF frequencies for the detoxification of the intestine, kidney, lymph and liver. TREF means “Terrain regulation of electrical frequencies” and they were developed by Alan E. Baklayan, ND who discovered and/or rediscovered these frequencies from the literature. They serve to improve a number of different systems: acid-base balance, hormonal regulation, blood, nerve control, sympathetic, parasympathetic, etc. Detailed information is provided in the introductory courses.

Application

For detoxification therapy, we strongly recommend using the DTX ChipCard once daily at 4.2 volts.

Other therapies often cause the release of toxins into the body, which in turn can reduce their effectiveness. In order to remove such toxins, use the DTX ChipCard twice weekly at 4.2 volts.

Other uses: in almost all treatments, it makes sense to encourage detoxification. If several of the tested meridian points need support, this is a clear indication to run this ChipCard.

Duration per application (39 minutes total)

Intestine 1-2	3:00 min each
Kidney 1-4	3:00 min each
Lymph 1-4	3:00 min each
Liver 1-3	3:00 min each

Results/Benefits

Two therapists observed, independently of each other, how horses would very often urinate immediately after their regular use of the DTX-ChipCard. This means that the frequencies on the DTX-ChipCard stimulated the excretion of accumulated, harmful substances from the body.

A cancer patient always used the DTX-ChipCard after chemotherapy. This resulted in her excreting the chemotherapy drugs out again, which could be recognized in the smell and colour of her urine. The side effects of her chemotherapy treatment were significantly reduced. The patient felt better than without using the DTX-frequencies.

Therapy Tips

During a detoxification therapy, the organs should be supported with herbal extracts for liver or kidney so that the process runs more smoothly.

This is one of the most widely used ChipCards. In all our seminars, colleagues have been reporting its effectiveness. It can be used for cases of poisoning, congestion, constipation, dry skin, pale urine.

At a glance

Frequencies for recovery from psychological burdens as well as stopping the metabolism of cancer

Bioenergetic Testing

German Test kit:
“Inneres Milieu
Reinigungsampullen
nach Krankheitsbildern”
(Internal environment
cleansing according to the
clinical indication).

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
Cancer patients: **BR** improves bioregulation.
- **IM** stimulates the immune system.
- **ImPar** activates the immune system against parasites.
- **ImVir** activates the immune system against viruses.
- **GoldenStream**
General balancing of energy levels.

FvE (Emotional Stress)

*Reduce the effect of emotional stress,
slows down the metabolism of cancer*

Original German Name:

“Folge von Emotionen” (Following from Emotions).

How it Works

The FvE ChipCard program can:

- Make intercellular membranes more permeable for waste removal and repair.
- Reduce the metabolism of cancer cells in tumour patients.
- Restore the electrical energy in the cells.

The cell structure can lose its voltage levels through chronic contamination, toxins or injury—or from exhaustion.

Application

Frequency of use

Mornings and evenings 3 to 7 min each

Duration per application (39 minutes total)

Until no intensity or amplification can be tested

Results / Benefits

Patients relax while their subconscious and suppressed psychological blockages are released.

The cancer’s metabolism is slowed down.

Software-notes:

This relatively new ChipCard requires software version V12 or higher, otherwise an error message will be displayed. Further details can be found on page 67.

of energy levels

GewAbn (Weight regulation)

An easy way to regulate your weight

Original German Name:

“Gewichtsregulierung”.

How it Works

The GewAbn frequencies assist, in combination with other measures, the regulation of the patient’s weight. They work by activating the adrenal gland, thyroid and the metabolism.

Application

Frequency of use

1-2x daily

Intensity set to 4.2 V

Duration per application (12:30 minutes total)

GewAbn (weight reduction) 1-5

2:30 min each

As supporting frequencies are used, a low intensity of 4.2 volts is sufficient. Along with the use of the GewAbn ChipCard, a diet should be followed.

We recommend patients who are unable to lose weight to give up wheat products as they can often cause a blockage. In the total absence of wheat products, and the simultaneous use of this ChipCard, a steady weight loss is usually achievable without any yo-yo effect (this means that upon completion of the diet, the lost weight will not return).

Caution: Eating more and then using the ChipCard more often does not really work. A “responsible” lifestyle and a time-limited diet are necessary for success.

Results

To the surprise of many of the patients themselves, rapid results have often been recorded.

Many users have reported losing weight, even without a change in their diet! Losing 2-3 kg (4.4-6.6 lb) within 10-14 days of use is not uncommon. The GewAbn ChipCard has been found to work very well, especially with patients that have been trying to lose weight for years. That means that even where a loss of weight has been blocked, the stimulation of the metabolism enables the weight losing process. The burning of excess slag, caused by influencing the adrenal gland and regulating the thyroid, can result in an impressive weight reduction.

Therapy Tips

- Some patients have difficulty digesting milk proteins. Everything is “sticky and slimy” even in the colon. The increase of mucus enhances the “phlegm” in the digestion process. Here, it could be worthwhile to consequently cut out all products containing milk proteins for a limited time.
- Taking Vermella Slim has been shown to improve long-term weight loss.

At a glance

Frequencies against hepatitis C and other hepatitis viruses

Supporting ChipCards

- **BiBlo** releases energetic blockages
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels
- **ImVir** activates the immune system against viruses
- **ImPar** activates the immune system against parasites

Hep C (Hepatitis C)

Effectively eliminate Hepatitis C

How it Works

The ChipCard contains various frequencies that are specifically effective against Hepatitis C, where it should be observed that they can also act against other hepatitis viruses.

Application

Duration per application (16:30 minutes total)

Hep C 1-11	1:30 min each
------------	---------------

Results

This ChipCard was developed after patients with hepatitis C were treated with frequencies and the viral load was then no longer detectable. Since then it has been used successfully.

Therapy Tips

- **Warning!** Viruses often hide in leeches such as Fasciolopsis buski and Fasciola hepatica. These must be treated as well.
- It is necessary to use Samento and Takuna as natural antivirals!

HNO (Ears, Nose and Throat)

No problems with Ears, nose and throat

Original German Name:

“Hals-Nase-Ohren” (Throat-Nose-Ears).

How it Works

The HNO ChipCard contains classic frequencies for Streptococci and 1-2 Staphylococci to combat bacterial infections. It was developed by Alan E. Baklayan, ND at the suggestion of several other therapists who wanted to find new ways of treating children.

Application

Duration per application (35 minutes total)

HNO (Ears, Nose & throat) 1-7	3:00 min each
Recommended duration for chronic diseases:	Min. 6 weeks

- For acute infections, run twice a day at the maximum intensity that can be run before starting to feel a tingling sensation. When used on children, consider their delicate skin and to avoid any burns, use only a minimum low voltage of 1 volt.
- When the sinuses are free, allowing the body to better excrete bacterial waste, a rapid improvement of the symptoms can be expected. The treatment can then be increased up to three times a day.
- For chronic infections, e.g. chronic suppurative frontal sinusitis or paranasal sinusitis, middle ear inflammation: 1 x daily which should be continued, after the symptoms have subsided, in order to drain the “nest of bacterial infections”.

At a glance

Inhibit bacterial infections

Bioenergetic Testing

Nervous system, Lymph-Meridian, Lung Meridian

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels
- **ImVir** activates the immune system against viruses
- **CLD** Sinus program (included with the BioWave unit)

At a glance

Activate protection against all types of herpes

Bioenergetic Testing

Viruses can be tested well on the nervous, endocrine and lymphatic systems as well as on the liver. Open the intercellular space with 3.6 Hz beforehand.

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels
- **ImVir** – an important ChipCard to activate the immune system against viruses

Note: In deep-seated infections (inner ear, sinus bones, etc.), ensure drainage of the lymphatic system. Use a liquid vitamin/mineral complex like Mineralvit, or something similar, mineral salt and drink plenty of water for this purpose. Detoxification can be assisted with the DTX ChipCard, kidney and liver preparations.

Additional applications

For all complaints associated with a cocci bacteria infection, the programs on the HNO ChipCard are very effective for colds, abscesses, mucosal infections (eye), as well as for knee or joint infections, inflammation in the kidney, lung.

Results

One ENT specialist very much likes to use this ChipCard for the routine treatment of children, as its effect has always been successful. During seminars, doctors and paediatricians have told us again and again how helpful this ChipCard has been for the treatment of children's infections.

Therapy Tips

- For staphylococci and streptococci (for more staphylococcus and streptococcus frequencies, see the Rife tables), initiate therapy using nasal irrigation and high doses of vitamin B2.
- Activate lymph detoxification and lymphatic drainage with TREF frequencies, vitamin C and Echinacea.

HSX (Herpes simplex)

Say final goodbyes to Herpes

How it Works

The HSX-ChipCard, which has been called such due to its primary function, also includes frequencies for Herpes zoster, Herpes type 6 and Herpes progenitales. Additionally, there are further frequencies against EBV and cytomegalovirus. Therefore, this ChipCard activates protection against all of these viruses, which belong to the same family and often occur together in patients during an infection.

Application

Duration per application (45 minutes total)

HSX (Herpes simplex) 1-9	45:00 min
Recommended duration:	Min. 3 months

Speciality: When affected with the Herpes zoster virus, this therapy may enhance the symptoms at first. In this case, stop using the HSX frequency. It can be restarted once the symptoms have eased.

Additional applications

- Epstein-barr, Cytomegalo and Herpes VI viruses are responsible for a range of symptoms: chronic fatigue, fatigue, swelling of the lymph. It is worthwhile to determine how well the HSX ChipCard can be used in each individual case.
- Trigeminal neuralgia is often hidden behind a Herpes zoster infection.
- Herpes viruses are often responsible for a burning sensation on the skin.

Supporting ChipCards

- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream**
General balancing of energy levels
- **ImVir**
- **HNO**
- **ImPar**
- **CAN** as required

Therapy Tips

- Takuna has proven itself as a means against viral loads, which is why naturopath Alan E. Baklayan, ND has often prescribed it in his practice.
- It is important to strengthen the body's regulation by starting with GoldenStream, stopping bioenergetic blockades with BiBlo and detoxifying with the DTX ChipCard.
- Important: As Herpes viruses are intracellular, open the intracellular space with 3.6 Hz (included on the BL1 blood ChipCard) prior to testing.

IM (Immune System Stimulation)

Stimulate the immune system

Original German Name:

“Stimmulierung Immunsystem”
(Stimulate Immune System).

How it Works

Non-specifically stimulates the entire immune system.

Application

Duration per application (28:00 minutes total)

Results

A very popular ChipCard, which is used for all immune deficiencies, particularly for chronic immune deficiency, recurrent colds, flu.

When used for colds, this ChipCard should always be used before any other ChipCards.

Therapy Tips

The following preparations should be used to further stimulate the immune system:

- Barberry
- Samento
- Takuna
- Banderol

At a glance

Activate the immune system against parasites

Bioenergetic Testing

Symptomatically according to the diagnosis

by Alan E. Baklayan, ND

„Therapy Tips and Household Remedies“
by A. Baklayan, ND

ImPar (Immune System Parasites)

Be better equipped against parasites

Original German Name:

“Immunsystem Parasiten”.

How it Works

This relatively new ChipCard contains classic Rife frequencies that are the most effective here. The frequencies used are not aimed at any specific parasite or even a range of parasites. Instead, they provide a general stimulation of the immune system to that it can in turn work better against parasites.

Application

Frequency of use

1x daily	For a wide range of immune system related conditions. For all diseases, associated with parasites
2x year for 6 weeks	For parasite cleansing

Duration per application (13 minutes total)

General stimulation of the immune system against parasites	
60 Hz	1:00 min
727 Hz	1:00 min
787 Hz	1:00 min
125 Hz	1:00 min
440 Hz	1:00 min
64 Hz	1:00 min
102 Hz	1:00 min
128 Hz	1:00 min
524 Hz	1:00 min

Duration per application (13 minutes total)

690 Hz	1:00 min
1864 Hz	1:00 min
1865 Hz	1:00 min

Results

The ImPar ChipCard is really very stimulating for the immune system as confirmed by the experiences with various patients. Test values for parasites improved faster when using this ChipCard.

Therapy Tips

- Do not underestimate the role of parasites in the cause of disease. Parasites play a major role in numerous conditions, including allergies, migraines, menstrual pain, rheumatism, intestinal problems, and increased venosity.
- We recommend that you keep your intake of animal proteins to a minimum, as parasites like to feed on them.
- The intake of herbal medicines to combat parasites supports recovery. Examples include: Papain treatment, energized Noni juice and Juglandis. For more details, please read: “Therapy Tips and Household Remedies” by Alan E. Baklayan, ND.

- **GoldenStream**
General balancing of energy levels
- **INF** – Influenza program (included with the BioWave unit)

ImVir (Immune System Viruses)

Stimulate against viruses

Original German Name:

“Immunsystem Viren”.

How it Works

Various frequencies specifically stimulate the immune system when there are viral strains present, such as influenza viruses or the patient has influenza. These frequencies have been proven to be very effective and to work well in parallel with other more specific treatments.

Application

Frequency of use

1x daily

Intensity 2 – 4.2 volts

Duration per application (30 minutes total)

Immun 1–10

3:00 min each

Use in acute cases, and at the first signs of a cold, at least once daily. As required, can be increased up to three times a day. The intensity should be set in the range between 2 and 4.2 volts.

Additional applications

For all viral infections or chronic conditions such as Herpes or Epstein-Barr viruses, it is important to use this ChipCard on a regular basis.

The ImVir ChipCard can even help in treating the immunodeficiency AIDS.

For viral children’s diseases, such as mumps, measles and German measles, the ImVir ChipCard should definitely be used.

Therapy Tips

For immune system support against viruses, Takuna and Samento work.

At a glance

Really effectively testing, minimize intracellular strain

InCom (Intracellular communication)

Better cell communication

Original German Name:

“Intrazelluläre Kommunikation”.

How it Works

The frequency improves intracellular communication, opens up the cells and should be used before BOTH bioenergetic testing procedures.

Application

Duration per application

Open up cells	3:00 min
Treat	7:00 min

Results

This ChipCard is now routinely used for 3 minutes, in many practices, before carrying out any testing on the patients.

Therapy Tips

In all cases of intracellular problems (Borrelia, viruses and heavy metals), this ChipCard is a must before any testing!

KONZ (Concentration)

Stay focused in everyday life

Original German Name:

“Konzentration”.

How it Works

The KONZ (from German “Konzentration” meaning “concentration”) ChipCard contains frequencies (brain frequencies, Lateralization dysfunction) that enhance the circulation of the brain and thereby improves concentration.

Application

Frequency of use

1x daily	Increase as necessary
----------	-----------------------

Duration per application (11:30 minutes total)

Concentration 1 – 6	11:30 min
---------------------	-----------

The Konz ChipCard should be used once a day. In times of increased stress, such as during exams, it can be applied more often.

Results

Users have reported being immediately able to think more clearly, especially during long strenuous mental work.

Therapy Tips

- Detoxify the liver
- If the patient suffers with chronic fatigue, test for the Epstein-Barr virus and use the HSX ChipCard.

At a glance

Improve concentration, be more productivity in everyday life

Bioenergetic Testing

On the nervous system

Supporting ChipCards

Lipometabolism free parasites, reduce cholesterol level

Bioenergetic Testing

Liver Meridian, smallintestine meridian, organ degeneration meridian

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** is very important to enable the excretion of waste products from the liver via the intestines, skin, lymph and kidneys
- **GoldenStream** General balancing of energy levels
- **GewAbn** – activates the metabolism

Recommended reading

„Cholesterol - Shock and Alternative“ by Alan H. Baklayan
ISBN: 0974028738

L (Liver)

Keep the liver healthy

Original German Name: “Leber”.

How it Works

At the end of the testing phase, the liver has to be checked in order to determine whether the patient is free of parasites. Parasites need cholesterol in order to grow and that is why they like the liver.

The parasites that are most closely associated with a lipid metabolism are Giardia lamblia and roundworms. That is why AE Baklayan, ND developed the frequencies, found on the L- ChipCard, for eradicating these parasites. This ChipCard also contains additional frequencies to support liver detoxification.

Application

Frequency of use

How often:	1x daily
Recommended duration:	At least 6 weeks

Duration per application (61 minutes total)

Ascaris larvae	2:30 min
Ascaris 3	2:30 min
Liver detoxification	2:00 min
Break No 1	20:00 min
Ascaris eggs	3:00 min
Lambliia	2:00 min

Duration per application (61 minutes total)

Cholesterol reduction 3	1:00 min
Cholesterol reduction 4	1:00 min
Break No. 2	20:00 min
Ascaris 4	2:30 min
Cholesterol reduction 1	1:30 min
Cholesterol reduction 2	1:00 min
Intestinal detoxification	1:00 min
Ascaris larvae	1:00 min

Reducing cholesterol is very easy. A simple liver cleanse (costs about 4 Euros), should be performed twice a year for which, you will need:

- Cold-pressed olive oil
- 1 grapefruit
- 4 capsules L-Ornithin

This is a fantastic way to supplement the L-ChipCard treatment by cleansing the liver long term. The protocol should be regularly repeated until the liver has been cleansed.

In 95% of all cases, cholesterol levels are normalised. The lifelong intake of statins, which millions of people have needed to take up until now, is no longer necessary.

The book “Cholesterol - Shock and Alternative” was written in 2001 in connection with the development of the L-ChipCard and the Lipobay scandal (Note: Lipobay is a compound that lowers cholesterol).

Additional applications

- A liver detox is often recommended, as this will be indicated for many cases
- All forms of increased venosity: varicose veins, haemorrhoids, lack of oxygen, shortness of breath

- All signs of age, stiffness without exception, decreased activity, failing eyesight, sluggishness of the internal organs.

Therapy Tips

- The importance of a healthy liver, which is the central organ for the metabolism, can not be emphasized often enough. A thorough liver cleansing can take up to a year.
- The preparations Cucurvit, Bitterstern and liver herbs provide excellent additional support for the liver.

LY (Lymphatic drainage)

Gently treat congestion and stagnation

Original German Name:

“Lymphdrainage”.

How it Works

The LY programme assists the natural lymphatic flow with electronic lymphatic drainage.

This causes more blood to flow to the skin and hypodermic layers in a manner similar to a hand massage. Congestion and odema are reduced due to the increase in flow and drainage of lymphatic fluid.

Swollen areas that are overloaded with cell fluid are decongested, which relieves the pain.

Application

Frequency of use

Mornings and evenings 2x daily for 15 min.

Duration per application

Until the congestion or pain has subsided.

Intensity

Increase the voltage until a comfortable tingling waveform can be felt. **Important:** The tingling sensation should not be too strong.

Results

Patients feel relief and report experiencing better circulation.

Pain is reduced significantly.

At a glance

Lymphatic drainage with amplitude modulation

Bioenergetic Testing

Lymph system after diagnosis.

Supporting ChipCards

- **BiBlo** removes bioenergetic blockages.
- **DTX** enables the excretion of waste products and detoxifies.
- **GoldenStream** generally balances energy levels.
- **GewAbn** supports the liver, gall bladder and metabolism.

Recommended reading

„Sanfte Lymphdrainage mit dem BioWave“ (“Gentle Lymphatic Drainage with the BioWave”) by Stephan Wiede.

Therapy Tips

A worthwhile supplement to this therapy with the LY ChipCard, is to take the following, daily:

- BURBUR (2x daily, 8 drops) or
- Lymph tincture (e.g. Derma-Clean LY or Byoclien Ly), 1 teaspoon with water.

Software-notes:

This relatively new ChipCard requires software version V12 or higher, otherwise an error message will be displayed. Further details can be found on page 67.

MIG (Migraine)

Farewell migraines

Original German Name:

“Migräne”.

How it Works

According to Dr. Clark, Strongyloides (filarial-form) cause migraines. A second parasite has been found to be *Dirofilaria immitis* (heartworm usually found in dogs). Frequencies for both these parasites are on the ChipCard. Other causes, such as biophysical blockades (BiBlo- ChipCard), amalgam (heavy metal removal) and liver detoxification have to be treated separately.

Application

Frequency of use

How often:	1x daily
In acute cases:	up to 3x daily

Duration per application (18 minutes total)

MIG 1–6	3:00 min each
---------	---------------

In rare cases, patients might experience a slight migraine attack, as the parasites are “provoked” by the frequencies. In such cases, immediately stop using the ChipCard treatment until the migraine attack subsides. Then apply the MIG-ChipCard even more intensely, once the migraine is over.

By treating bioenergetic blocks and removing heavy metals, this affliction can be resolved. The immune system can additionally be activated against parasites with the ImPar ChipCard.

At a glance

Successfully eliminate parasites that cause migraine

Bioenergetic Testing

The parasites need to be tested on the nervous and endocrine systems where they are generally easy to find.

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels
- **ImPar** activates the immune system against parasites

Additional applications

The dog heartworm is often found in relation to heart disease and associated cardiac arrhythmia. Therefore, an attempt to treat these conditions with the MIG-ChipCard may be worthwhile.

Results

Some successful results have been achieved with the MIG-ChipCard. One example of many: We found *Dirofilaria immitis* (dog heartworm) again and again in migraine patients. As a result of the appropriate therapy, patients were relieved of their symptoms almost immediately. Within one year, we documented a dozen cases for which the MIG ChipCard led to the symptoms being relieved relatively quickly.

Therapy Tips

- An amalgam exposure can completely block this therapy in migraine patients.
- We recommend testing patients for amalgam and related issues
- Run a heavy metal detoxification at the same time (see “Therapy Tips and Household Remedies”).

Reg SZ (Menstrual Pain)

Be free of menstrual pain and irritable bladder

Original German Name:

“Regelschmerz”.

How it Works

Both an irritable bladder and menstrual pain have frequently shown the presence of *Trichinella*. To eliminate this pathogen, two sequences have been developed against menstrual pain and irritable bladder. When the pathogen’s natural resonance is applied, patients find relief from painful menstruation, period related headaches, painful bladder disorder and urinary irritation. Studies by Dr. Stefan Rastocny have confirmed a lasting relief from these symptoms, because the underlying causes have been eliminated.

Application

Frequency of use

2-3 times a day, either 3 x in succession or at intervals of 8 -12 hours

Total duration: Repeat daily for up to two months, and repeat if necessary. After the symptoms have subsided, continue treatment for another two weeks.

Duration per application:

Menstrual Pain sequence	45:00 min
Irritable bladder sequence	56:00 min

Results

The observational study of 14 patients over a period of two months, using specific high-frequency therapy

At a glance

Menstrual pain and irritable bladder can be a thing of the past

Supporting ChipCards

- **BiBlo** for preparation
- **DTX** promotes the excretion of wastes and detoxification
- **GoldenStream** General balancing of energy levels

Recommended reading

„Menstrual Pain? - From problem to a real solution!“ by Dr. Stefan Rastocny

Available as free download from www.menstrualpainrelief.info

treatments three times daily for 45 minutes each time, confirms the long-term relief from menstrual pain.

On a scale of 0-10, the menstrual pain index is decreased from 7.6 (average calculated for all subjects) to 2.6 and after further treatment down to 1.9 (0 = no pain, 10 = maximum pain value).

At the same time, the duration and intensity of the period, as well as the requirements for sanitary napkins / tampons, have been significantly reduced.

Additionally, patients experienced the total relief from—or at least a significant reduction in—associated symptoms such as headaches and breast tenderness.

Software Notes for the ChipCards BB, FvE and LY

As these relatively new ChipCards make use of new modulated frequencies, older units need to have a software update before these ChipCards can be used.

How to determine which software version is installed in your BioWave:

1. Switch on your BioWave unit.
2. Repeatedly press the Program Up-key (on the BioWave 77, the Back-key) until “Settings” is displayed.
3. Press the Enter-key.
4. The software version is now displayed, e.g. “BW21 V12” or “BW77 V12”.

If “V11”, or a lower version is displayed, then the software needs to be updated before you can use the BB, FvE or LY ChipCards.

Please contact your dealer, or the manufacturer of your BioWave unit, in order to have your unit updated.

Frequency-Technology with BioWave and ChipCard Applications for a better quality of life

Be fit and vital with specific frequencies!

- ✓ Bio-frequencies improve the flow properties of blood and relieve toxin build up and clumping.
- ✓ The frequencies from the BioWave generator make the cell membrane permeable and promote intracellular exchange
- ✓ Zapping slows microorganism activity which allows the immune system to more easily “dispose” of these organisms.
- ✓ Pain levels are reduced!

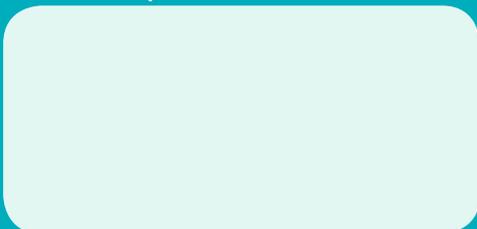

In the experience of many practitioners and users, these effects occur, with daily use, after just a few minutes.

Additionally, we recommend an increased daily dosage of vitamin C and dietary supplements, such as kidney and liver herbs, chlorella, algae.
