

## "Smoking cessation with the anti-smoking Chip"

### **You will need:**

- a BioWave 21 LCD
- the Anti-smoking Chip
- two metal plates (plates) and 2 red cable
- the hand electrodes
- test-ampoules "anti-smoking ampoules"

### **Now the steps of the application:**

→ Connect the first metal plate with the Bio Wave 21 (short red wire to + terminal) and then connect the second red, short cable with the first metal plate. Finally, you put together the second plate with the hand electrode. (See chart)

→ You Light up a cigarette and push them right back out (the best you can do this by someone else!). Insert the cigarette into a small glass and put it onto the first plate.

→ In the testbox "anti-smoking ampoules" are five different vials, which are placed in that order after each beep on the second panel:

**1. LUNG 2. BLOOD 3. LIVER 4. BOWEL 5. TISSUES**

→ Connect the black wire with the Bio Wave 21 LCD and the second hand electrode.

Now plug the chip into the anti-smoking drive of the Bio Chip Card 21LCD and turn on the

BW 21 LCD.

Take the hand electrodes firmly in your hands.

It appears the sign of AR Anti-smoking and a time target of 45 minutes.

Any anti-smoking frequency is 9 minutes. You will be reminded by a beep to place the next ampoule to the plate.

→ Use this anti-smoking program 2 times a day.

→ When appears withdrawal symptoms and craving for a cigarette, you can let the program run again in between.

To support the detoxification measures and to help absorb the free radicals, we recommend the following additional program:

→ Anti-smoking drops 3 x daily 10 drops  
equally for each use 10 drops further

→ Omegas 2 x 1 capsule daily

→ **Caution: Be sure to drink at least 2 liters of still water a day.**
